Project Demo Planning

Date	03 October 2026
Team ID	TEAM-ID-TO-BE-FILLED
Project Name	PocketSmart AI: Your Smart Budget & Recommendation Assistant
Maximum Marks	1 Mark

Project Demo Planning

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & problem statement	Budget overload across home, party and jewelry shopping; project goal	1	Sanjay C
2	Architecture & tech stack	FastAPI + Gemini + SQLite diagram; budget-check engine; fallback design	2	Aravinth K
3	Account flow	Register, login, dashboard, session	1	Kaushal N
4	Home and Party planners (live)	Enter budget, show plan, remaining budget, shop links	2	Krishna Kailash Yedida
5	Jewelry planner with outfit photo (live)	Upload photo, outfit analysis, jewelry picks	2	Krishna Kailash Yedida
6	History, validation and testing	Reopen a plan, invalid input, show 43 tests and load-test results	2	Rangesh V S
7	Scalability, future plan, Q&A	Roadmap and answers	2	Whole team

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Use PS-1 to PS-3 from Phase 1
2	Solution Overview	Show architecture diagram and the "AI proposes, server verifies" idea
3	Live Feature Demonstration	Log in as `demo`; run Home, Party, Jewelry (with photo); open History; show a validation error
4	Q&A Session	Be ready to explain the Gemini fallback chain, budget trimming and JWT logout

Pre-demo checklist

- `.env` has a working `GOOGLE_API_KEY`; run `python tools/check_gemini.py` the day before.
- `python tools/seed_demo_user.py` has been run; server started with `uvicorn main:app`.
- Keep an outfit photo (JPG/PNG under 5 MB) ready on the desktop.
- If Wi-Fi fails, the app still shows offline estimates; explain the fallback as a feature.
