Project Initialization and Planning Phase

Date	03 October 2026
Team ID	TEAM-ID-TO-BE-FILLED
Project Name	PocketSmart AI: Your Smart Budget & Recommendation Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template)

PocketSmart AI helps people who must spend a fixed amount of money across many products and services and cannot tell whether a plan fits the budget until after they have browsed several platforms.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A first-time home owner furnishing a flat	Buy lights, ceiling fans, furniture and a dining table within a fixed budget	I overspend on one category and run short on others	Prices differ on IKEA, Amazon and Flipkart and I have no single view of the total	Anxious about overspending
PS-2	A host planning a birthday or family party	Split my budget between venue, catering, decoration and entertainment	I cannot tell how much each part should cost for my guest count	Quotes are scattered across Swiggy, Zomato, OYO and decor shops	Stressed and unsure
PS-3	A shopper buying jewelry for a wedding or festival	Find pieces that match my outfit and stay within budget	I cannot judge what suits my outfit colour and style	Catalogues are huge and show no budget-aware or outfit-aware guidance	Overwhelmed
PS-4	A busy student or young professional	Get a ready, shop-able plan in minutes	I waste hours comparing sites	There is no one assistant that plans across categories and platforms	Relieved if the plan is done for me
